Yea, the LSP was a pain. I talked to Louis Martin yesterday about bringing the LRV down and planting it right there in Texas Brine, he wasn't too thrilled. But I asked Eric to think about it and let me know what he thinks. It would take a couple of days to get it down there but I sure don't have a problem with it being there.

And estimate for the 50 days.

Subject: Bayou Corne Schedule and estimate

Greg,

We've got personnel scheduled for all of the time slots for the next two weeks. Am working on the cost estimate now. Do you want me to go out 50 days? Was going to include some travel costs. I know we'll end up running into some shifts that Baton Rouge will be unable to cover. For rates I was going to use a blend, due to not knowing the entire schedule. Robert said one of the LSP was not very receptive to our staging in their MCP. Do you think one of the EPA LTVs would be available?

Please let me know if these assumptions are acceptable.

David
